SOURCES: Tourism data mostly for 2003 from Compendium of Tourism Statistics, 1999-2003 (WTO, 2005) supplemented by J. L. McElroy, "Small Island Tourist Economics Across the Life Cycle," Asia Pacific Viewpoint 47 (1)(forthcoming January, 2006); area and population data from The World Factbook 2005 (online). <http://www.odci.gov/cia/publications/factbook/index.html>.

- NOTES:
1. Values in color are author's estimates.
 2. Average daily visitor density is calculated as $[(\text{Tourists} \times \text{Stay}) + \text{Day}] / (\text{Population} \times 365) \times 1,000$.
 3. Impact indices calculated as: $(\text{Indicator Value} - \text{Minimum Value}) / (\text{Maximum} - \text{Minimum Values})$.
 4. Tourism Penetration Index (TPI) scores are the unweighted average of the three impact indices.
 5. Where TPI scores were identical, rank was determined by giving precedence to the island with higher per resident visitor spending.
